

MOUNTING BRACKET SPECIFICATION
Document MB-204 Rev C

1. PURPOSE

This specification defines the mounting bracket used to fix the sensor housing to the frame rail.

2. PLATE

The bracket is machined from a single flat plate.

Plate thickness	4.5 mm
Plate width	40 mm
Plate length	90 mm

3. FIXING HOLE

A single through hole is drilled on the plate centreline.

Hole diameter	7.3 mm
Hole centre from short edge	15 mm

4. NOTES

The hole diameter of 7.3 mm and the plate thickness of 4.5 mm are controlled dimensions. Do not substitute nominal fastener sizes for the hole diameter; the value given here is final.
